## **Kubis Mirror - Limestone**

Designed by

Kristian Sofus Hansen &  
Tommy Hyldahl

# Kubis Mirror - Limestone

---

## Product Description

The Kubis Mirror transforms a functional object into a sculptural presence.

A slender rectangular plane rises through a precise cut in a solid limestone base, creating a quiet dialogue between reflection and stone. The limestone's tactile, hand-carved sides reveal subtle irregularities that speak to the hand of the maker, adding depth, texture, and a raw natural beauty. These softened edges draw the eye, framing the mirror not merely as a surface, but as a focal point of material contrast.

An adjustable bolt concealed at the back allows the mirror to tilt gently, offering perfect alignment with your space and your perspective. Placed on a console, dresser, or sideboard, the Kubis Mirror brings a calm, architectural presence to the room. Standing freely, Kubis becomes both object and artwork, where minimal design meets architectural poise, inviting moments of reflection as well as admiration.

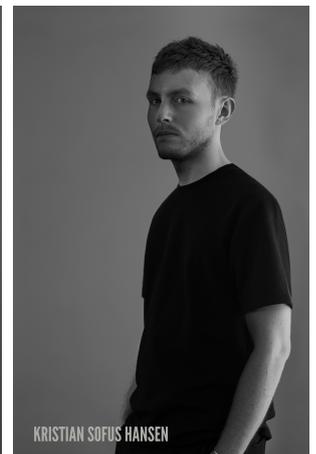

## Designer Description

Tommy Hyldahl and Kristian Sofus Hansen intertwine their distinct sensibilities to create designs where storytelling, materiality, and timeless form meet in quiet harmony.

With a background in fashion, Tommy brings an intuitive eye for trends, colors, and textures. His process is one of layering histories, blending details and references from past design periods and reimagining them into something fresh and contemporary. Each collection unfolds as a narrative, evolving from concept to creation, with every element contributing to a greater story.

Kristian, who has lived and studied in Japan, seeks to unite Japanese aesthetics with Danish design, creating a characteristic twist on simplicity itself. His work is defined by the search for subtle, original details that elevate each piece with a unique signature. Drawing inspiration from art and sculpture, his creative process unfolds in new and exciting ways, always striving to craft designs that are both functional and timeless.

Together, they craft design that transcends time, poetic yet practical, expressive yet enduring.

## Family Description Text

The Kubis Mirror transforms a functional object into a sculptural presence. A slender rectangular plane rises through a precise cut in a solid limestone base, creating a quiet dialogue between reflection and stone. The limestone's tactile, hand-carved sides reveal subtle irregularities that speak to the hand of the maker, adding depth, texture, and a raw natural beauty. These softened edges draw the eye, framing the mirror not merely as a surface, but as a focal point of material contrast.

An adjustable bolt concealed at the back allows the mirror to tilt gently, offering perfect alignment with your space and your perspective. Standing freely, Kubis becomes both object and artwork, where minimal design meets architectural poise, inviting moments of reflection as well as admiration.

## Color Description

Our limestone is defined by a soft, sand-beige tone with gentle warmth drawn from its geological origins. Subtle variations in beige shades create an organic depth, evoking the timeless character of stone shaped over millennia. Calm and versatile, this sand-beige colour conveys quiet elegance and serves as a refined foundation for both modern and traditional settings.

## Maintenance Guide Description

Handle the mirror with both hands, supporting the frame and limestone base. The stone is naturally very heavy, so always lift with care and avoid putting strain on any single point of the piece. Keep the mirror in dry indoor environments to protect both the stone and reflective surface.

Clean the mirror using a microfiber cloth and a non-ammonia glass cleaner, applying cleaner to the cloth rather than directly onto the glass to prevent runoff onto the stone. Dust the limestone regularly with a soft brush, and clean using a lightly dampened cloth with distilled water or a pH-neutral stone cleaner. Avoid acidic products, bleach, ammonia, and abrasives, and always dry the stone immediately after cleaning.

Prevent stains by keeping liquids, cosmetics, and oils away from the limestone. Minor stains may be treated with a small amount of baking-soda poultice if needed. For long-term protection, a penetrating stone sealer may be applied every one to two years.

When moving the mirror, wrap the limestone carefully and lift with sufficient support to avoid damage from the stone's weight. Regular light dusting and occasional gentle cleaning will maintain the natural beauty and longevity of the piece.

## Materials Description

This piece combines two contrasting materials: mirror glass and limestone. The mirror is made from high-quality reflective glass that provides clear, accurate imaging and a smooth, polished surface, offering a refined and modern aesthetic. It pairs with limestone, a natural sedimentary stone known for its soft texture, matte finish, and subtle mineral variations. Each limestone element carries unique tonal shifts and organic markings, giving the piece a grounded, sculptural presence through the stone's natural weight and character. Together, these materials create a balanced expression that blends the precision of glass with the tactile, elemental qualities of stone.
