

MIDJ

Walter Coffee Table

Walter coffee table with four leg frame base in lacquered or chrome metal. Top in metal or ceramic.

Available in two variants.

Colors and Materials

Structure

White steel

Black steel

Sand steel

Brown steel

Grafite metal

Fango steel

Bronze metal

Pastel yellow steel

Ocher steel

Red steel

Sage green metal

Light blue metal

Ocean blue steel

Light grey steel

Facepowder pink
metal

Chrome

Papaya orange steel

Golden yellow metal

Ash grey metal

Bulgaro red metal

Cherry red metal

Pine green steel

Dark green metal

Golden bronze

Matt golden bronze

Black Nickel

Matt black nickel

Golden champagne

Pink Gold

Blue turquoise metal

White pearl metal

Blue sapphire metal

Top

Satin

Dimensions

	A (cm) (inch)	B (cm) (inch)	C (cm) (inch)
Walter 40x40 (cm) (inch)	50 19.7	40 15.7	40 15.7
Walter 60x40 (cm) (inch)	50 19.7	60 23.6	40 15.7

Volumetric Details

Weight 12 Kg
Volume 0.17 mc
Package 1

Materials Certifications

Dark green metal

The technologies used in the previous phase of powder coating play a fundamental role in the final result of the processing. They are in fact essential to increase adherence paint on the metal surface and then guarantee its duration over time. The metal frames, following a total cleaning of the surface, pass through chemical conversion processes, creating a compact base that allows for better adhesion of the subsequent treatment. In the last phase the object subjected to the powder coating process is placed in a polymerization oven, going to form an adherent and extremely tight layer durable. This particular paint job is ideal for outdoor use.

To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects. Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long.

These surface treatments are not suitable for outdoor use, but they guarantee excellent resistance to frequent use, dirt and dust.

Materials Certifications

Matt golden bronze	Galvanic treatments consist in applying a thin layer of a metal or other alloy, in order that properties of the surface are modified, both from a technical and an aesthetic point of view. Through this procedure it is possible to improve specific product features, such as endurance to corrosion. CLEANING AND MAINTENANCE To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects. GENERAL TIPS Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long. These surface treatments are not recommended for outdoor, naval or seaside use.
